

Develutions Progress Assessment

Based on their self-reported status — Source: Develutions email, 27 December 2025

Claimed Overall Progress:
55-60%

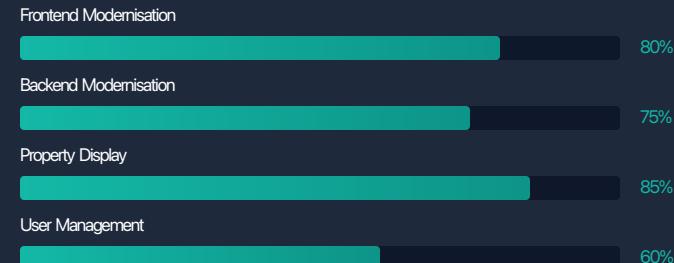

This figure is unverified.

We have not seen the code. This is Develutions' self-assessment.

Recommendation: Request code access or demonstration before accepting this claim.

Progress Breakdown (from Develutions' Report)

Infrastructure (High Progress)

Business Functions (Low/No Progress)

Analysis

The 55-60% overall figure is achieved through strong infrastructure progress.

The functions that directly support revenue generation remain incomplete or out of scope.

Question: How will this rebuild enable InvestRand to scale if the business-critical functions are not addressed?
